-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Acknowledgment

1. Receipt of the preliminary amendment filed 6/27/03 has been acknowledged and entered. Claims 1-7 have been canceled. This application is a division of application 10/050,144 now US. patent 6,629,578 B2. Applicants must amend the specification to reflect this information.

Claim Objections

2. Claim 8 is objected to because of the following informalities: The words "their axes" lack antecedent basis and also unclear. The examiner suggests the following correction to overcome the objection:

Line 3 of claim 8 inserts -- a first bevel gear, including a first axis, provided --,

Line 4 of claim 8 inserts -- a second bevel gear, including a second axis, meshed with the first bevel gear --,

Line 4 of claim 8 replaces "their axes" with -- the axes --.

Appropriate correction is required.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in

scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. In this instance, claims 8-11 of this application conflict with claims 8-11 of Application No. 10/608,835. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The reference to Fujii discloses an electrically driven power steering apparatus, wherein a leaf spring (17) is connected between the bevel gear and the steering shaft so as to prevent backlash from occurring. Claims 8-11 are allowed because the prior art neither shows nor teaches that the support shaft is allowed to move toward the second bevel gear and is biased toward the second bevel gear by a biasing member and in combination with other elements recited.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takehara et al. ('898) and Watanabe et al. ('306) are cited of interest.
